

Amendment to the Specification:

Please replace the paragraph at pg. 11, ll. 17-20 with the following amended paragraph:

The pseudo-distances are therefore transmitted in the form of a radio signal RA to the assistance server [[50]] 500. Before reaching the server [[50]] 500, this signal RA passes through the base station [[30]] 300 and then the GSM telephone network [[40]] 400.
